Education

The Australian National University (ANU), Computer Science (Bachelor of Computing)

Canberra, Australia
Feb 2022 – Feb 2025

- Enrolled at ANU in February 2022 (part of double degree program).
- Graduated in February 2025.

Universitas Indonesia (UI), Computer Science (Sarjana Ilmu Komputer)

Depok, Indonesia
2019 – Feb 2025

- Enrolled at UI in August 2019.
- Transferred to ANU in February 2022 (part of double degree program).
- Finished in July 2025.

Experience

Institute for Advanced Study, Princeton University, Back-end Developer

Jakarta, Indonesia
July 2025 – 2026
1 year

- Developed and implemented a new API integration for the company's BIONS App which improves user's experience in stock trading.
- Developed a converter between versions of Financial Information eXchange (FIX), andITCH protocol which is a stream of market data for transactions and market info with Nasdaq's SoupBinTCP. Additionally, tested various FIX and ITCH messages and scenarios to ensure quality and performance.
- Collaborated with a team of 4 developers to migrate legacy code, resulting in a high-performance, modular, and maintainable code. Created documentations for legacy and current protocols by mapping tags and illustrating diagrams to assist developers understand issues and possible solutions.

Awards

ANU Chancellor's International Scholarship

Feb 2022

The ANU Chancellor's International Scholarship offers an opportunity for students from around the world to access one of multiple scholarships available to undergraduate and postgraduate students. The scholarship is designed to attract a diverse range of high calibre international students to commence study at ANU.

The Australian National University

study.anu.edu.au/scholarships/find-scholarship/anu-chancellors-international-scholarship

Finalist at BIONIX ISE ITS 2018

2018

Finalist at Institute of Technology Surabaya's Information Systems Expo 2018. A national team competition in Indonesia for Information Systems as a high school student.
Institut Teknologi Sepuluh Nopember

Participant at Tsukuba Science Edge 2017

2017

Science Booth Poster Presentation of Natural Bagasse as Sound Absorber at Tsukuba, Japan. An international Science Idea Contest for high school students.
Tsukuba International Congress Center

Publications

Zur Elektrodynamik bewegter Körper

It concerned an interpretation of the Michelson–Morley experiment and the properties of light and time. Special relativity incorporates the principle that the speed of light is the same for all inertial observers regardless of the state of motion of the source.

Albert Einstein

Über einen die Erzeugung und Verwandlung des Lichtes betreffenden heuristischen Gesichtspunkt

In the second paper, he applied the quantum theory to light to explain the photoelectric effect. In particular, he used the idea of light quanta (photons) to explain experimental results, but stressed the importance of the experimental results. The importance of his work on the photoelectric effect earned him the Nobel Prize in Physics in 1921.

Die Grundlage der allgemeinen Relativitätstheorie

The publication of the theory of general relativity made him internationally famous. He was professor of physics at the universities of Zurich (1909–1911) and Prague (1911–1912), before he returned to ETH Zurich (1912–1914).

Quantum Computing Jan 2018

Quantum Information Jan 2018

Projects

Quantum Computing Jan 2018 – Jan 2018

Quantum computing is the use of quantum-mechanical phenomena such as superposition and entanglement to perform computation. Computers that perform quantum computations are known as quantum computers.

- Quantum Teleportation
- Quantum Cryptography
